SMART MOORING BUOY

Oceanspot

Smart buoy helps marinas to expand mooring capacity. The angled buoy version allows boater to book the buoy by scanning a QR code on the top.

Technology

Oceanspot is composed of different technologies using artificial intelligence. Thanks to LoRa technology, the signal can reach several kilometers and 10 years battery.

Eco positive impact

Reducing fuel consumption and carbon emissions making inventory. Regarding environment issues, Nauticspot and partners provide an eco-friendly mooring system in order to protect seabeds.

Interactive marina map

Nauticspot technology brings the real-time supervision aspect (like a layer) and is compatible with existing softwares :

Benefits

Traffic and occupation statistics

Distancing real-time supervision

Operational time saving

Increase mooring capacity & fuel saving
